

DSZC16

HIGH-EFFICIENCY HEAT PUMP

McClure
AIR CONDITIONING & HEATING

UP TO 16 SEER PERFORMANCE

The McClure DSZC16 Heat pump offers up to 16 SEER (Seasonal Energy Efficiency Ratio) performance, when properly matched and installed. The higher the SEER, the more efficient the unit - and the less it costs to operate.

Reliable performance

The McClure DSCZ16 Heat Pump is thoughtfully engineered to use less energy and perform without a hitch - in both hot and cold weather. It's built to last, built to save, and built to bring you worry-free comfort, year after year.

Quiet operation

Expert acoustic engineering means your McClure heat pump will deliver quiet, reliable heating and cooling. Special noise-reducing features include a high-density foam sound-reduction cover, a well-designed wire discharge grille and two-speed operation for the condenser fan motor. So relax, and enjoy a refreshingly peaceful home.

Energy savings

The McClure DSCZ16 Heat Pump's up to 16 SEER high-efficiency performance means you will cool your home for less, compared to lower SEER units. And with an HSPF (Heating Seasonal Performance Factor) of up to 9.5, you'll save on heating costs too.

R-410A refrigerant

This chlorine-free refrigerant helps increase the durability and reliability of air conditioner compressors.
