

GMVC96

GAS FURNACE

McClure
AIR CONDITIONING & HEATING

**TWO-STAGE.
VARIABLE-SPEED.
96% AFUE PERFORMANCE.**

The McClure GMVC96 Gas Furnace delivers up to 96 AFUE (annual fuel utilization efficiency). That means 96 cents of every dollar spent on natural gas warms your home, which can add up to generous savings when compared with less efficient systems.

Versatile efficiency

With an efficient two-stage gas valve design, and a quiet, variable speed airflow system, the McClure GMVC96 Gas Furnace runs at the lowest possible speed required to maintain the perfect indoor environment. This versatility maximizes heat output, while using less energy than single-stage furnace designs, which are either 'on' or 'off'. Plus the GMVC96 Gas Furnace works right alongside your central air conditioner. So relax, and enjoy a comfortable home, all year long.

Advanced safety features

We know that nothing is more important than your family's safety and comfort. That's why we designed the McClure GMVC96 gas furnace to create less NOx, and included other security features like a combination redundant gas valve and regulator, integrated controls with diagnostics, and a durable hot surface igniter.

Award-winning components

At the center of every gas furnace is the heat exchanger. The GMVC96 Gas Furnace features a unique, award-winning heat exchanger design made with dual-diameter aluminized steel, and wrinkle bend technology. Plus, it's supported by a secondary stainless steel heat exchanger, which helps this furnace deliver the ultimate in reliable, efficient heating.

ComfortNet™ Compatible

This digital communications technology lets you continuously monitor your system's performance, and offers advanced diagnostics and automatic maintenance alerts.

McClure

McClure means comfort.

GMVC96

GAS FURNACE

Product Features

- Aluminized-steel dual-diameter tubular heat exchanger
- Efficient, quiet variable-speed circulator motor
- Low-voltage terminals with provisions for air cleaner and humidifier
- Durable silicon nitride ignitor
- Single-stage gas valve
- Electronic control board with self-diagnostics
- Multi-position installation
- Auto-comfort mode for enhanced dehumidification
- Quiet two-speed induced draft blower
- Multiple continuous fan speed options offer quiet air circulation
- Powder-paint finish
- Fully-insulated cabinet
- Electronic ignition control
