

# GPG14M

HIGH-EFFICIENCY PACKAGED UNIT

*McClure*

AIR CONDITIONING & HEATING

**PERFORMANCE  
UP TO 14 SEER /  
81% AFUE**

With up to 14 SEER (seasonal energy efficiency ratio) performance and up to 81% AFUE (annual fuel utilization efficiency), the McClure GPG14M Packaged Unit delivers dependable heating and cooling while using less energy than lower-rated models.

## Factory-tested quality

When you invest in a McClure GPG14M Packaged Unit, you'll enjoy the peace of mind that comes with tireless, quality-driven engineering. Before ever leaving our factory, each GPG14M Packaged Unit has been fully charged, and passed rigorous performance and reliability testing. So go ahead and get comfortable with your new GPG14M Packaged Unit - it's going to be there for a long time.

## Space-saving design

The McClure GPG14M Packaged Unit combines a gas heat pump with an electric air conditioner into a single, compact unit that can be installed on the ground or even on the roof outside your home or business. This efficient, self-contained design maximizes space while delivering dependable heating and cooling all year long.

## Advanced engineering

The combination of a unique, aluminized steel heat exchanger design and high performance compressor and all-aluminum coil delivers a packaged unit that's powerful enough to heat and cool your home even in extreme weather. Plus the McClure GPG14M Packaged Unit costs less to operate than lower rated models, which can add up to substantial savings on utility bills.

## Safety Features

You'll sleep easier knowing your GPG14M Packaged Unit has been designed with enhanced security features like a direct spark ignition system, and self-diagnostic blower operation and safety circuits.
