HIGH-EFFICIENCY AIR CONDITIONER

McClure

AIR CONDITIONING & HEATING

## UP TO 18 SEER PERFORMANCE

When correctly matched and installed, the McClure DSXC18 Air Conditioner delivers up to 18 SEER (seasonal energy efficiency ratio) performance. A higher SEER rating means better efficiency, and lower operating costs compared to lower-rated units.

### Dependable performance

What heat wave? With advanced technology including a two-stage scroll compressor, two speed condenser fan motor, and coil and ambient temperature sensors, you can count on the McClure DSXC18 Air Conditioner to maintain the perfect indoor environment – no matter how hot it gets outside.

### Quiet operation

The McClure DSXC18 Air Conditioner features built-in acoustic enhancements to greatly reduce operating noise – like a high-density foam compressor cover, efficient condenser fan motor and a specially designed wire discharge grill. Pair quiet operation with robust cooling, and get ready to enjoy a more peaceful night's sleep. Sweet dreams.

### Energy-efficient technology

The efficient McClure DSXC18 Air Conditioner delivers the perfect combination of performance and efficiency. Rated up to 18 SEER, this unit is also compatible with the ComfortNet™ communications system. ComfortNet has a range of features that can help automate, monitor and review data from your cooling system, helping it deliver even better efficiency and performance.

### R-410A refrigerant

Chlorine-free R-410A refrigerant helps improve the durability and efficiency of your McClure DSXC18 Air Conditioner. It's easier on the environment than R-22 coolant, and gentler on the components in your system, too.
