ENERGY-EFFICIENT AIR CONDITIONER

McClure

AIR CONDITIONING & HEATING

## UP TO 16 SEER PERFORMANCE

When properly matched and installed, the McClure GSX16 Air Conditioner delivers up to 16 SEER (seasonal energy efficiency ratio) performance. A higher SEER rating means a more efficient unit and better energy savings compared to lower-rated models.

### Durable design

Own the McClure GSX16 Air Conditioner, and enjoy years of trouble-free cooling. With durable, high-performance components like a high-efficiency coil and condenser, safely protected inside a heavy gauge steel cabinet, the GSX16 Air Conditioner delivers reliable performance season after season. Plus, with a SEER rating up to 16, you can expect substantial annual savings on utility costs when compared to models with lower SEER ratings.

### Quiet performance

Your cooling system should never intrude on a good night's sleep. That's why the McClure GSX16 Air Conditioner was engineered with special sound-dampening features like a louvered sound-control top, and a quiet condenser fan. Sweet dreams.

### Advanced coil technology

Smaller and smarter: The GSX16's advanced coil design made with 5mm rifled copper tubing and aluminum fins dramatically improves heat transfer. This allows the McClure GSX16 Air Conditioner to deliver powerful cooling, while using less refrigerant – even in scorching summer heat waves.

### R-410A refrigerant

Gentler on the environment than R-22 coolant, and easier on your unit's compressor too. Chlorine-free R-410A refrigerant helps improve the durability and efficiency of your McClure GSX16 Air Conditioner.
