

DSXC16

HIGH-EFFICIENCY AIR CONDITIONER

McClure

AIR CONDITIONING & HEATING

UP TO 16 SEER PERFORMANCE

When correctly matched and installed, the McClure DSXC16 Air Conditioner delivers up to 16 SEER (seasonal energy efficiency ratio) performance. A higher SEER rating means better efficiency, and lower operating costs compared to lower-rated units.

Reliable performance

The McClure DSXC16 Air Conditioner includes advanced features like a two-stage scroll compressor, efficient condenser fan motor, and specially designed copper coil. So no matter how hot it gets outside, you can always rely on the DSXC16 Air Conditioner to maintain the perfect indoor environment.

Sound dampening features

The McClure DSXC16 is designed to deliver smooth, quiet operation. Special noise-reduction features are built right in, like a high-density foam compressor cover, efficient condenser fan motor, and specially designed wire discharge grill. Combine that with powerful cooling performance, and you're ready to relax and enjoy a more peaceful night's rest. Sweet dreams.

Energy efficient technology

The efficient McClure DSXC16 delivers up to 16 SEER performance, which means it can produce generous savings on utility costs compared to lower rated units. The McClure is also compatible with the ComfortNet communications system, which has a range of features that can help automate, monitor and review data from your cooling system - helping it deliver even better efficiency and performance.

R-410A refrigerant

Chlorine-free R-410A refrigerant helps improve the durability and efficiency of your McClure DSXC16 Air Conditioner. It's gentler on the environment than R-22 refrigerant, and it's easier on your air conditioner's components, too.
