

AVZC20

HIGH-EFFICIENCY HEAT PUMP WITH INVERTER TECHNOLOGY

McClure
AIR CONDITIONING & HEATING

The McClure AVZC20 Heat Pump with Inverter Technology delivers top-tier efficiency compared to other heating and cooling systems.

**UP TO 21 SEER
10 HSPF**

Make it a McClure.

Your air conditioner has a huge impact on your everyday life. Choose wisely. McClure HVAC equipment is engineered to provide optimal comfort, efficiency and reliability - while staying affordable.

AVZC20 features include:

ComfortNet™ Compatibility

Experience cutting-edge options for taking control of your indoor comfort. Enjoy programmable and remote options, continuous performance monitoring and automated maintenance alerts.

Quiet Performance

We've acoustically engineered our systems with enhancements that include a compressor sound-reduction cover made of high-density foam and a specially designed sound-control top.

Energy-Efficient Technology

Energy efficiency equates to long-term cost savings. The McClure brand AVZC20 HEAT PUMP offers up to 21 SEER and 10 HSPF energy-efficiency performance — which can lead to significant savings on your monthly electric bill when compared to lower-rated systems.

Inverter Technology: Only pay for the power you need.

Our variable-speed inverter technology compressor automatically adjusts power and speed levels to use the least amount of energy to maintain the temperature you've set on the thermostat. The result is a consistently comfortable home with lower utility bills compared to single-speed compressors.
